Direct Hay Weighted Average Report for week ending 1/13/2023

Volume			
	This Week	Last Reported (1/2/2023)	Last Year
Tons:			
Hay	17880	20281	0
Straw	1011	1054	0
Total	18891	21335	0
Bales:			
Hay	415	912	0
Straw	2	2	0
Total	417	914	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report demand remained strong, prices remained mostly steady, and actual trades were up for the south-central region. Conversations last week revolved around questions regarding a softening market. Although there were discussions, actual prices reported remained firm. Many agree that if precipitation is not received within the next 30 days, they will be up against "the trouble line" which may result in the selling off of cattle. Conversely, southeastern Kansas farmers would like to be in the fields but have found them too soft to begin their work, despite the drought situation. According to the U.S. Drought Monitor for January 10th, Kansas areas recorded little if any precipitation and over 57% of the state remains in extreme to exceptional drought. The current categorical percent area for abnormally dry conditions (D0) remained at 15%, moderate drought (D1) remained at 16%, severe drought (D2) remained near 12%, extreme drought (D3) decreased to 19%, and exceptional drought (D4) increased to near 38%.
