Direct Hay Weighted Average Report for week ending 4/21/2023

Volume			
	This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Good weather has made for some long hours and tired farmers. Thirty percent of the corn crop is already in the ground which is twenty points ahead of the five year average. Five percent of beans are planted. Those with alfalfa are fighting with weevils. No official reports yet but several have said they are only a week or so at most from starting to cut some rye and like crops to begin wrapping. Near 10 percent of the state is showing on the latest drought monitor and several in other areas have mentioned it is pretty dry and a little moisture would be welcomed. The supply of hay is light, demand is light to moderate and prices are steady. The Missouri Department of Agriculture has a hay directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/>

N/A						
Hay (Conventional)						

Alfalfa - Supreme (Ask/Per Ton)

	<u>Qty</u>	<u>Price Range</u>	<u>Wtd Avg</u>	<u>Freight/Use</u>	<u>Description</u>	<u>Crop Age</u>
Medium Square 3x3		250.00-300.00		F.O.B.
