Direct Hay Weighted Average Report for week ending 6/2/2023

Volume		
This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Hay harvest is well underway now. Although slightly behind the five year average this early in the season that number changes quickly depending on when the sun shines. Most producers so far are not reporting very good yields which was an expected result of late cold snaps and lack of spring moisture. As of the latest drought monitor over eighty percent of the state is in some stage of drought now. Hay interest has been very good as many livestock producers are interested in acquiring inventory now as long term forecast are not very favorable currently and fear of low supplies and even higher prices farther down the road are a likely possibility. The supply of hay is light and demand is moderate to good. Hay prices are fully steady. The Missouri Department of Agriculture has a hay directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/>
