Direct Hay Weighted Average Report for week ending 4/21/2023

Volume			
	This Week	Last Reported (4/10/2023)	Last Year
Tons:			
Hay	845	2395	1600
Straw	0	80	0
Total	845	2475	1600
Bales:			
Hay	140	0	350
Total	140	0	350

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week, all reported forages sold fully steady. Demand has been good for hay staying in the local trade area and from out of state interest. Some talk of what the new crop price is going to be on alfalfa hay. Nothing set in stone as of this writing but, there were several conversations on the topic. All forages will have a set back this weekend as most areas of the state is to be in the mid to low 20's overnight. Frost temperatures in April is never good for the crops trying to emerge and grow. Some corn planting around the state. Some fields of new seeding alfalfa have been planted under pivots. Very spotty rain showers with some snow in different parts of the state. On a hole, the state is still very dry to severe drought.

*** Prices are dollars per ton FOB the field or hay barn unless otherwise noted.***

Alfalfa guidelines (for domestic livestock use and not more than 10% grass)
