Direct Hay Weighted Average Report for week ending 4/28/2023

Volume			
	This Week	Last Reported (4/17/2023)	Last Year
Tons:			
Hay	1025	845	1050
Total	1025	845	1050
Bales:			
Hay	130	140	200
Total	130	140	200

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week all reported hay sales sold steady. Demand was good. Bulk of the state has been moved into the Extreme drought category this week by the US Drought Monitor. It's dry! Several farmers are running pivots so they can plant into some moisture. Quite a few livestock owners continue to buy some hay as grazing conditions look bleak and they will need to keep supplementing hay. Calls this week were a tick depressing as everyone is in the same boat and producers are very concerned on what they will be able to produce for tons of hay this year.

*** Prices are dollars per ton FOB the field or hay barn unless otherwise noted.***

Alfalfa guidelines (for domestic livestock use and not more than 10% grass)
