Direct Hay Weighted Average Report for week ending 4/21/2023

Volume		
This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Special Note: Wheat Class is Beardless Wheat.

This is the first report of the season. Trade very active, demand very good on limited supplies as hay farmers are just getting started on the 1st cutting in the southern part of the state. Conditions are dry and no rain forecasted for the next several weeks. Hay prices continue to trade high relative to last year due to high input costs.
