Direct Hay Weighted Average Report for week ending 5/5/2023

Volume			
	This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Special Note: Wheat Class is Beardless Wheat.

Compared to last week, alfalfa hay prices steady. Trade very active, demand very good. Most hay farmers to the south are still in the 1st cutting. A few are finished and getting ready for the 2nd cut. Conditions are mostly dry. Light rain reported in the eastern part of the state. Water release from the dam will be May 12th. Hay prices continue to trade high relative to last year due to high input costs.
