Direct Hay Weighted Average Report for week ending 3/31/2023

Volume			
	This Week	Last Reported (3/13/2023)	Last Year
Tons:			
Hay	900	200	24985
Total	900	200	24985

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Special Note: No reported sales last week so no report was issued the week of March 20, 2023,

Compared to last Friday, no trends as there where no reported sales last week. A lower undertone was noted. Trade remains slow with light demand. Trade sources indicate that Korea has cancelled basically all of their hay exports from US and are buying from Australia due to the \$ conversion rate there versus here. So there are now TONS and TONS of hay that was previously sold on contract that is now no longer spoken for.
