Federal Milk Order Principal Pricing Points, with Class I Differentials

| Federal Milk Marketing Order Area | Order Number | Principal Pricing | Major City in Principal Pricing Point | Class I Differential for: | |
|-----------------------------------|--------------|-----------------------|---------------------------------------|---------------------------|--|
| | | | | Principal Pricing | Other Major Cities in the Order |
| Northeast | 1 | Suffolk Co., MA | Boston | \$3.25 | New York City, \$3.15; Philadelphia, \$3.05; Baltimore, \$3.00; and Washington, DC, \$3.00 |
| Appalachian | 5 | Mecklenburg, Co., NC | Charlotte | \$3.10 | Knoxville, \$2.80 and Louisville, \$2.20. |
| Florida | 6 | Hillsborough, Co., FL | Tampa | \$4.00 | Orlando, \$4.00 Miami, \$4.30; and Jacksonville, \$3.70. |
| Southeast | 7 | Fulton Co., GA | Atlanta | \$3.10 | New Orleans; \$3.60; Memphis, \$2.80; Nashville, \$2.60; and Springfield, MO., \$2.20 |
| Upper Midwest | 30 | Cook Co., IL | Chicago | \$1.80 | Milwaukee, \$1.75; and Minneapolis, \$1.70. |
| Central | 32 | Jackson Co., MO | Kansas City | \$2.00 | Des Moines, \$1.80; Omaha, \$1.85; Oklahoma City, \$2.60; St. Louis, \$2.00, and Denver, \$2.55. |
| Mideast | 33 | Cuyahoga Co., OH | Cleveland | \$2.00 | Indianapolis, \$2.00; Cincinnati, \$2.20; Pittsburgh, \$2.10; and Detroit, \$1.80 |
| Pacific Northwest | 124 | King Co., WA | Seattle | \$1.90 | Portland, \$1.90; and Spokane, \$1.90. |
| Southwest | 126 | Dallas Co., TX | Dallas | \$3.00 | Houston, \$3.60; San Antonio, \$3.45; Albuquerque, \$2.35; and El Paso, \$2.25 |
| Arizona-Las Vegas | 131 | Maricopa Co., AZ | Phoenix | \$2.35 | Las Vegas, \$2.00. |
| Western | 135 | Salt Lake Co., UT | Salt Lake City | \$1.90 | Boise, \$1.60. |

Methodology:

The Class I Milk Price is the monthly milk price announced each month for all milk used to produce Class I Fluid Milk products. The Class I Milk Price for each Order is determined by adding the Class I differential for the particular county location of the regulated handler to the monthly Class I Mover. The Class I Milk price listed in the table are at the order's base location. The Class I Milk Price represents the minimum milk price required to be paid by regulated handlers to producers pooled under the Federal milk marketing order program for milk used to produce Class I Fluid Milk products.

The monthly weighted average Class I Milk Price is derived by multiplying the individual minimum class I price by the amounts of milk used to produce Class I milk product in each marketing order each month in order to obtain the value of each order's monthly Class I milk. The aggregated combined monthly Class I milk value is then divided by the total amount of Class I milk pooled for the month in order to obtain the monthly weighted average Class I Milk Price for all combined orders.

The year-to-date and annual weighted average Class I Milk Price for each and all orders is derived by multiplying the individual monthly minimum class I prices by the amounts of milk used to produce Class I milk product in each marketing order for the year in order to obtain the value of each order's Class I milk. The aggregated combined Class I milk value is then divided by the total amount of Class I milk pooled for the year in order to obtain the year-to-date and annual weighted average Class I Milk Price.

The Class I Butterfat Price is the monthly price announced each month for butterfat used to produce Class I Fluid Milk products. The Class I Butterfat Price for each Order is determined by adding the Class I butterfat differential for the particular county location of the regulated handler to the monthly announced Class I butterfat price. The Class I Butterfat price listed in the table are at the order's base location. The Class I Butterfat Price represents the minimum milk price required to be paid by regulated handlers to producers pooled under the Federal milk marketing order program for butterfat used to produce Class I Fluid Milk products.

The monthly weighted average Class I Butterfat Price is derived by multiplying the individual minimum class I price by the amounts of butterfat used to produce Class I milk product in each marketing order each month in order to obtain the value of each order's monthly Class I butterfat. The aggregated combined monthly Class I butterfat value is then divided by the total amount of Class I butterfat pooled for the month in order to obtain the monthly weighted average Class I Butterfat Price for all combined orders.

The year-to-date and annual weighted average Class I Butterfat Price for each and all orders is derived by multiplying the individual monthly minimum class I butterfat prices by the amounts

of butterfat used to produce Class I milk product in each marketing order for the year in order to obtain the value of each order's Class I butterfat. The aggregated combined Class I butterfat value is then divided by the total amount of Class I butterfat pooled for the year in order to obtain the year-to-date and annual weighted average Class I Butterfat Price.

The Class I Skim Milk Price is the monthly milk price announced each month for all skim milk used to produce Class I Fluid Milk products. The Class I Skim Milk Price for each order is determined by adding the Class I differential for the particular county location of the regulated handler to the monthly Class I Mover. The Class I Skim Milk price listed in the table are at the order's base location. The Class I Skim Milk Price represents the minimum milk price required to be paid by regulated handlers to producers pooled under the Federal milk marketing order program for skim milk used to produce Class I Fluid Milk products.

The monthly weighted average Class I Skim Milk Price is derived by multiplying the individual minimum class I skim milk price by the amounts of skim milk used to produce Class I milk product in each marketing order each month in order to obtain the value of each order's monthly Class I skim milk. The aggregated combined monthly Class I skim milk value is then divided by the total amount of Class I skim milk pooled for the month in order to obtain the monthly weighted average Class I Skim Milk Price for all combined orders.

The year-to-date and annual weighted average Class I Skim Milk Price for each and all orders is derived by multiplying the individual monthly minimum class I skim milk prices by the amounts of milk used to produce Class I milk products in each marketing order for the year in order to obtain the value of each order's Class I skim milk. The aggregated combined Class I skim milk value is then divided by the total amount of Class I skim milk pooled for the year in order to obtain the year-to-date and annual weighted average Class I Skim Milk Price.

Information Contacts

Listed below are the specialists in the Agricultural Marketing Service, Dairy Programs, Market Information Branch to contact for additional information. E-mail inquiries may be sent to DairyMarketInformation@ams.usda.gov.
