

FEDERAL MILK ORDER PRICE AND POOL SUMMARY, FEBRUARY

HIGHLIGHTS. Handler reports of receipts and utilization under the new Federal milk order system have been filed and tabulated. Combined totals for the 11 consolidated orders are being released. During February, about 9.7 billion pounds of milk were received from producers. This volume of milk is 3.6 percent higher than the adjusted February 1999 volume. Slightly more than 3.7 billion pounds of producer milk were used in Class I products, 1.0 percent higher than the previous year. The all-market average Class utilization percentages were; Class I – 39, Class II – 11, Class III - 41, and Class IV - 10. The weighted average statistical uniform price (blend price under old pricing system) was \$11.48 per cwt., \$0.19 less than last month, and \$3.64 less than last year.

1/ Names in parentheses are principal pricing points of markets.

2/ Previous year figures are the simple summation of the data for the orders that were consolidated. For those orders that also include partial marketing area changes or the addition of unregulated area, the figures for the previous year were adjusted for these changes; in some cases these adjustments are based on estimated data. No adjustments to previous year figures were made for handler regulation shifts that result from other than marketing area changes. Data for February 2000 have been adjusted to a 28-day basis before computing percent changes.

3/ Statistical uniform price for component pricing orders (Class III price plus producer price differential). For other orders, uniform skim milk price times 0.965 plus uniform butterfat price times 3.5.
