

FEDERAL MILK ORDER PRICE AND POOL SUMMARY, NOVEMBER

HIGHLIGHTS. Handler reports of receipts and utilization under the Federal milk order system for November have been filed and tabulated. Combined totals for the 11 consolidated orders are being released. During November, about 9.2 billion pounds of milk were received from producers. This volume of milk is 2.0 percent lower than the adjusted November 1999 volume. About 4.0 billion pounds of producer milk were used in Class I products, 2.9 percent higher than the previous year. Calendar composition likely had a slight positive impact on milk used in Class I in 2000 as compared to 1999. The all-market average Class utilization percentages were; Class I = 43%, Class II = 9%, Class III = 43%, and Class IV = 5%. The weighted average statistical uniform price was \$12.11 per cwt., \$0.24 lower than last month, and \$2.26 less than last year.

ALL MARKET AVERAGE OR TOTAL		9,155.8	-2.0	3,955.9	2.9	43	9	43	5	12.11

1/ Names in parentheses are principal pricing points of markets.

2/ Previous year figures are the simple summation of the data for the orders that were consolidated. For those orders that also include partial marketing area changes or the addition of unregulated area, the figures for the previous year were adjusted for these changes; in some cases these adjustments are based on estimated data. No adjustments to previous year figures were made for handler regulation shifts that result from other than marketing area changes.

3/ Statistical uniform price for component pricing orders (Class III price plus producer price differential). For other orders, uniform skim milk price times 0.965 plus uniform butterfat price times 3.5.

4/ Due to a disadvantageous relationship between class prices and location adjusted statistical uniform (blend) price in some markets, handlers elected not to pool milk that normally would have been associated with these markets.
