

FEDERAL MILK ORDER PRICE AND POOL SUMMARY, JUNE

HIGHLIGHTS. Handler reports of receipts and utilization under the Federal milk order system for June have been filed and tabulated. Combined totals for the 10 consolidated orders are being released. During June, about 10.0 billion pounds of milk were received from producers. This volume of milk is 5.2 percent higher than the June 2005 volume. In both June 2006 and June 2005, there were significant volumes of milk not pooled due to intraorder disadvantageous price relationships. About 3.6 billion pounds of producer milk were used in Class I products, 4.5 percent higher than the previous year. Calendar composition likely had a positive impact on milk used in Class I in 2006 as compared to 2005. The all-market average Class utilization percentages were; Class I = 36%, Class II = 13%, Class III = 39%, and Class IV = 12%. The weighted average statistical uniform price was \$12.08 per cwt., \$0.11 higher than last month and \$2.61 lower than last year.

1/ Names in parentheses are the major city in the principal pricing point of the market.

2/ Statistical uniform price for component pricing orders (Class III price plus producer price differential). For other orders, uniform skim milk price times 0.965 plus uniform butterfat price times 3.5.

3/ Due to a disadvantage relationship between intraorder class prices and the location adjusted statistical uniform (blend) price in these markets, handlers elected not to pool an estimated 430 million pounds of milk, that normally would have been associated with these markets. In June 2005, the estimated not pooled volume of milk was 890 million pounds, occurring in Order Nos. 033, 030, and 032. After adjusting for these not-pooled volumes, the year to year percent change is +0.3%.

4/ Effective May 1, 2006, the name of the Federal order was changed. Clark County, Nevada, which includes Las Vegas, was removed from the marketing area.
