

FEDERAL MILK ORDER MARKETING AND UTILIZATION SUMMARY, AUGUST 2010

HIGHLIGHTS. Handler reports of receipts and utilization under the Federal milk order system for July have been filed and tabulated. Combined totals for the 10 consolidated orders are being released. During August, about 10.4 billion pounds of milk were received from producers. This volume of milk is 3.7 percent higher than the August 2009 volume. In August 2010, there were volumes of milk not pooled due to intraorder disadvantageous price relationships. About 3.7 billion pounds of producer milk were used in Class I products, 0.1 percent higher than the previous year. The all-market average Class utilization percentages were: Class I = 36%, Class II = 11%, Class III = 46% and Class IV = 7%. The weighted average statistical uniform price was \$16.92 per cwt., \$0.73 higher than last month and \$5.03 higher than last year.

1/ Names in parentheses are the major city in the principal pricing point of the market.

2/ Statistical uniform price for component pricing orders (Class III price plus producer price differential). For other orders, uniform skim milk price times 0.965 plus uniform butterfat price times 3.5.

3/ Due to a disadvantageous relationship between intraorder class prices and the location adjusted statistical uniform price in these markets, handlers elected not to pool an estimated 231 million pounds of milk that normally would have been associated with these markets. In August 2009, the estimated not pooled volume of milk was 511 million pounds, occurring in order numbers 030, 032, 033, and 124. After adjusting for non pooled milk, the year-to-year percent change is +0.7%.
