1/ Names in parentheses are principal pricing points of markets.

2/ Previous year figures are the simple summation of the data for the orders that were consolidated. For those orders that also include partial marketing area changes or the addition of unregulated area, the figures for the previous year were adjusted for these changes; in some cases these adjustments are based on estimated data. No adjustments to previous year figures were made for handler regulation shifts that result from other than marketing area changes.

3/ Statistical uniform price for component pricing orders (Class III price plus producer price differential). For other orders, uniform skim milk price times 0.965 plus uniform butterfat price times 3.5.

4/ Due to a disadvantageous relationship between class prices and location adjusted statistical uniform (blend) price in some markets, handlers elected not to pool milk that normally would have been associated with these markets.
